

## Institutional Distinctiveness

Bhende is the heart of 40 villages generally known as Jayakwadi Back water and Project rehabilitated region. Our institution has felt the need for providing higher education facilities and educating the youth for transforming villages and help them in their development. It realized that the future of **project affected youth** and **specifically girls** are entirely dependent on higher education. Keeping this in view our college was established at village Bhende in the year 1992.

- College took great efforts to provide higher education facilities to these project rehabilitees and strictly followed the vision.
- College laid special emphasis on girl's education as it was one of the distinctive missions of the college.
- To achieve this mission, our institution offered preference to girls in providing admissions and also facility of well-furnished **Jijamata Women's hostel**.
- Even college has provided **free Wi-Fi facility** in its campus for all students.
- Throughout the twenty five years so many students successfully completed their higher education and have been engaged in their respected fields.

## Best Practices

- The chemistry department of our college organises soil and water testing programme for the farmers in our tehsil area at minimum cost and distribute the report card of soil and water. With the help of this report card the farmers consult with agricultural officer and try to avoid chemical fertilizers and pesticides as per the given advice and thus support eco- friendly environment and production. Thus the department has distributed **14,917 Soil health cards** to the farmers.
- College invites representatives of several companies and organises campus interviews to promote the students to develop their carrier. During 2017-18 year about **45 students** of our college have been placed into the various services.
- Department of Zoology started **Vermicomposting unit** in college campus. Organic solid waste material converted into Bio-fertilizer by using vermi-composting unit has earthworm during the year.
